ABSTRACT DEADLINE
AUGUST 15, 2020

www.PediatricSedationConference.com
Dear Colleagues and Friends:

It is our pleasure to welcome you to the 2020 Pediatric Sedation Outside of the Operating Room Weekend Conference: “Exploring the Realms” in Pediatric Sedation, Friday The Basics and Beyond for Hospital-Based and Dental Sedation Symposium, Friday Pediatric Sedation Simulation Workshop and Saturday Comprehensive Approach to Pediatric Dental Sedation: The Didactics and High-Fidelity Pediatric Dental Sedation Simulation Workshop. This year we are again presenting a unique, enriching, and exciting multidisciplinary conference.

We are thrilled to be hosting the 15th annual conference in San Francisco, CA. As always, we have a diverse group of internationally and nationally recognized speakers and attendees from a variety of disciplines. The disciplines represented include: anesthesiology, emergency medicine, dental medicine, hospital medicine, intensive care medicine, pediatrics, nursing, oncology, cardiology, radiology, hospital administration. Attendees travel from countries not limited to but including Italy, Netherlands, Greece, Israel, Canada, Australia, Hong Kong, New Zealand, Japan, Brazil, Indonesia, South Africa, and Singapore. The specialized tracks, round table luncheons, and open forums enable us to share our experiences, ideas, and challenges.

On behalf of the entire faculty and planning committee, we would like to invite you to attend “Pediatric Sedation Outside the Operating Room.” We are certain that you will find the course and workshops both educational and enjoyable.

Sincerely,

Keira P. Mason, MD

Please note, a complete schedule for the Pediatric Dental Sedation Didactics and Symposium offerings are available online at: www.PediatricSedationConference.com
KEYNOTE LECTURES

Kevin Spencer, MEd
The Healing of Magic Therapy for Sedation
An award-winning performing artist who, for more than 25 years, toured the world with one of the largest and most successful theatrical illusion productions, and was the 2015 International Magician of the Year. At the pinnacle of his career, Spencer stepped away from the stage and into classrooms and hospitals. He is a Fulbright Specialist on arts integration for special populations for the U.S. Department of State. His program, Healing of Magic™ or Magic Therapy™ uses research based protocols of simple magic tricks as a fun and motivating way for patients to reach therapeutic goals and improve cognitive and motor skills. Spencer’s work has been featured in the Journal of the American Medical Association (JAMA). Today, the concepts of the magic therapy are being used in more than 2,000 hospitals and rehab centers in over 30 countries around the world.

Jonathan Keyser
You Don’t Need to be Ruthless to Succeed
When Jonathan entered the cut-throat world of commercial real estate brokerage, he became the worst version of himself and hated himself because of it. Then one day, he realized he was sacrificing his values in pursuit of success. He abandoned his ruthless ways and reinvented himself as a selfless leader, skyrocketing his brokerage firm to eight figures in five years. Through his focus on selfless service, Jonathan is disrupting the culture. Jonathan is the Wall Street Journal #1 Best-Selling author of “You Don’t Have to Be Ruthless to Win” and a nationally renowned speaker. His online Keyser Institute courses inspire others to activate selflessness in their life and implement counterintuitive strategy to create extraordinary, long-term success. Learn how to assess your team and leadership’s dynamics, identify upcoming roadblocks, and implement strategies to disrupt the status quo.

GUEST LECTURES

Immersive Virtual Reality to Alleviate Pain and Anxiety
Hunter Hoffman, PhD
SPECIAL INVITED SPEAKER
Dr. Hoffman is Director of the Virtual Reality Research Center at the University of Washington in Seattle. An early pioneer of Virtual Reality therapy, Hoffman originated the technique of using virtual reality distraction to reduce the pain experienced by burned children during painful medical procedures. Hoffman designed the first VR world (SnowWorld) for pain control and designed one the first VR exposure therapy worlds, SpiderWorld. Hoffman’s research has appeared on a number of scientific news stories and was identified by FastCompany.com as one of the Fast 50 people most likely to influence the next 10 years. Dr. Hoffman was most recently featured in the January 2020 National Geographic Magazine lead article dedicated to the science of pain.

Can “Consent” Ever Be Informed?
Both Sides Reviewed from the Legal and Sedationist’s Perspective
Stewart L. Cohen, Esq.
Founding Partner: Cohen, Placitella and Roth
Mr. Cohen won a landmark $25 million case, recognized as one of the Top 100 Verdicts in the United States. His clients have included children catastrophically injured at birth because of substandard medical care. He has made it possible for victims to successfully recover against hospitals and physicians.

Steven Shafer, MD
Expert Witness, Michael Jackson Manslaughter Trial
Dr. Shafer is a Professor of Anesthesiology, Perioperative and Pain Medicine at Stanford University. In 2011, the International Society of Anaesthetic Pharmacology (ISAP) awarded Dr. Shafer their Lifetime Achievement Award. Dr. Shafer is the Editor-In-Chief of Anesthesia & Analgesia. He was also the expert witness in the Michael Jackson manslaughter trial.

FRIDAY, NOVEMBER 13, 2020
FULL-DAY SEDATION SYMPOSIUM
The Basics and Beyond for Hospital-Based and Dental Sedation

BACK BY POPULAR DEMAND!
A Comprehensive Review of the Essentials and Practical Applications of Pediatric Procedural Sedation

This one-day course is a comprehensive update and review of the fundamentals of pediatric sedation with an emphasis placed on clinical applications of the content covered. The course combines a multi-platform learning platform consisting of didactic sessions, open forum question-and-answers, clinical case reviews and interactive video presentations. An optional hands-on workshop will provide personalized one-on-one faculty attention to gain hands-on experience using manikins to practice critical airway resuscitation skills.

This course is designed to provide a review of topics related to the safe and effective delivery of minimal, moderate and deep sedation by parenteral, intranasal, enteral and inhalation routes of administration. This course serves as an introduction and review of the principles of sedation using a case-based approach. Topics covered will include physiological monitoring, airway evaluation and management, pre-sedation patient assessment and post-sedation readiness for discharge, the basic pharmacology of commonly used sedatives, risk factors for adverse events, emergency preparedness and rescue. A special emphasis will be placed on non-pharmacologic techniques and strategies. Clinical case presentations will be presented in an interactive format to maximize discussion, collaborative sharing of ideas and consideration of options for procedural sedation. Case studies will include challenging and complex situations. Question and answer sessions will provide participants with forums to ask questions and discuss specific issues with course faculty.

This course will feature recognized leaders and faculty from different specialties, all leaders in the field of sedation. At the optional airway workshop, the attendee will have the opportunity to gain hands-on experience learning airway techniques to rescue patients from deep sedation, including practice with face masks and ambu bag along with the insertion of nasal and oral airways in a personalized setting with manikins and real equipment.

LEARNING OBJECTIVES
Upon completion of this activity, participants will be able to:

• Assess the pediatric airway and identify patients who may require advanced airway management.
• Recall and apply current recommendations regarding minimal, moderate and deep sedation.
• Evaluate the pharmacology and clinical application of commonly utilized sedatives and weigh the advantages, disadvantages, efficacy and adverse events associated with each option.
• Apply sedation concepts learned to evaluate complex and challenging sedation scenarios and formulate a plan.
• Provide a comprehensive review of the patient pre-sedation assessment necessary to identify appropriate candidates for procedural sedation.
• Implement recommended physiologic monitoring, including capnography, used to continuously assess patient status and to identify acute changes.
• Assess post-sedation readiness for discharge by applying standardized discharge criteria.
• Objectively consider sedative options based on patient condition, length and depth of targeted sedation and procedure to be performed.
• Employ non-pharmacologic techniques and strategies to minimize sedatives administered and improve the patient experience.
• Anticipate and prepare for sedation-related adverse events and perform rescue.
• Apply a wide range of non-pharmacologic and behavioral management techniques for anxiolysis and as a sedation adjuvant.
• Understand the breadth of sedation options across disciplines and apply them to one’s own practice.

Optional Session: Pediatric Advanced Life Support (PALS) Provider Course for Dentists and Dental Specialists

David Young, MD, MEd, MBA, FAAP, FASA, Lisa Caplan, MD, Priscilla Garcia, MD, William Waldrop, MD, Kenneth Wayman, MD, Gayle Young, RN

This workshop is the hands-on portion of the official American Heart Association PALS course. All participants MUST additionally purchase [current cost $132] and successfully complete the entire online module [estimated at 7.5 hours], as well as bring a certificate of completion to the hands-on session of this Meeting. PALS scenarios will be facilitated using high-fidelity manikins and real defibrillators.
Full-Day High Fidelity Pediatric Sedation Simulation Workshops

Workshop Description

Medical simulation is a highly adaptable tool for evaluating individual knowledge and team performance. Medical simulation can improve patient safety by raising an individual’s awareness of their practice and by enhancing team cohesion and performance. Simulation provides a safe environment for learning and evaluation, the opportunity to train with the actual equipment used in the clinical setting, and provides for repetition and reflection. This course is intended for practitioners providing moderate and deep sedation in a variety of practice settings. This activity offers a high-fidelity simulation experience to facilitate effective acquisition of the skills required for successful recognition and management of sedation-related complications. This unique and challenging program provides a clinical simulation experience that addresses the proper assessment and management of complications associated with moderate sedation and deep sedation. Following a brief introduction explaining essential principles, participants will demonstrate appropriate patient management on human patient simulators. This full-day simulation workshop will provide each registrant with five clinical scenarios intended to improve individual skills as well as to impart an understanding of a team approach to crisis resource management. Each registrant will become part of a small team which will rotate together through each of the five scenarios over the course of the day. The scenarios are intended to improve individual skills as well as the team’s reactions and responses. Structured post-simulation debriefings will integrate performance feedback, promote reflective practice, and augment future performance. The full-day of high fidelity simulation scenarios are facilitated by national and internationally recognized faculty with medical simulation expertise.

Course registration is limited to provide each registrant with an optimal, educational hands-on experience. There will be two optional “working” lunches which offers the opportunity to have additional hands-on experience with personalized faculty attention using manikins to develop and improve airway skills. The Airway Workshop is intended to solidify skills at delivering positive pressure ventilation using a face mask and self-inflating bag along with the insertion of nasal and oral airways. The Capnography Workshop will give learners a comprehensive understanding of capnography and they will learn why it is an integral part of monitoring sedation to enhance patient safety.

Learning Objectives

Upon completion of this activity, participants will be able to:

• Explain the importance of human-factors in the management of critical events.
• Summarize the key components of a simulation-based learning encounter.
• Describe how to incorporate simulation into the process of training sedation care providers.
• Demonstrate the appropriate components of a primary pediatric assessment.
• Develop an algorithm for the management of various causes of airway obstruction.
• Create a differential diagnosis for the etiology of respiratory depression.
• Construct an effective management strategy for the pediatric patient with respiratory compromise.
• Demonstrate appropriate management of the pediatric patient with cardiovascular compromise.
• Demonstrate proficiency in directing a team during a crisis.
### SIMULATION WORKSHOP SCHEDULE

**FRIDAY, NOVEMBER 13, 2020**

**PEDIATRIC SEDATION SIMULATION WORKSHOPS**

**Course Director:** Keira P. Mason, MD  
**Workshop Director:** David Young, MD, MEd, MBA, FAAP, FASA

Optional and limited enrollment. Pre-registration is required. There will be five unique scenarios, inclusive to all areas along the sedation continuum. Additional option for Airway Management or Hands-On Capnography Lunch Workshops. Participants will spend one hour in each of the five scenarios.

NOVEMBER 14-15, 2020
WEEKEND SEDATION CONFERENCE
“EXPLORING THE REALMS”

TARGET AUDIENCES
This multi-speciality conference is intended for physicians, dentists, registered nurses, CRNAs, nurse practitioners, advanced practice nurses, pharmacists, and health care administrators. Specialties include: anesthesiology, emergency medicine, hospital medicine, pediatrics, and intensive care medicine. Pediatric dentists, general dentists, dentist anesthesiologists, oral and maxillofacial surgeons as well as anesthesia care team members providing sedation and/or anesthesia care in dental office-based settings.

COURSE DESCRIPTION
This annual conference entitled, Pediatric Sedation Outside the Operating Room, is taught by multi-specialists, renowned in pediatric sedation, from both the United States and abroad. This course offers both didactic lectures and panel discussions. An optional hands-on airway workshop in basic skills will be offered. Small round table discussions with the faculty and afternoon concurrent tracks provide the attendee with an opportunity for discourse and interactive discussions.

The field of sedation continues to evolve and policies, recommendations and Center for Medicaid and Medicare Service guidelines change in response for the health care environment. Currently, sedation guidelines and recommendations differ between specialty societies; for example, the American Society of Anesthesiologists (ASA) guidelines on deep sedation are not concurrent with those of the American Society of Gastroenterology nor American College of Emergency Physicians. Sedative agents, delivery methods and routes of delivery are changing as new techniques and outcomes continue to be explored and presented. This course is designed to fill the practice gaps created by this combination of evolving practice guidelines, differing practice standards among specialty societies, and continuing advances in sedation medicine and technology by updating and reviewing state-of-the-art techniques for safe and effective delivery of sedation.

This conference is intended to improve learner competence and performance by reviewing not only the basics of sedation but also updating the registrant to current, evolving and state-of-the art practice (i.e. knowledge). The hands-on workshops on airway management and patient simulation using manikins will allow the learner to apply this competence to their everyday practice (i.e. performance) and prepare for the rare, unanticipated emergencies. Being prepared for emergencies as well as for the more common adverse events, the learner will be able to be better equipped to improve patient outcome. The aim of this conference is to increase the participant’s breadth of knowledge of pediatric sedation along with elaborate on ways to improve and track patient outcomes.

LEARNING OBJECTIVES
Upon completion of this activity, participants will be able to:
• Analyze recent changes in guidelines, regulations, policies and future developments in sedation systems and their impact on patient care.
• Complete an in-depth review of physiologic monitoring and develop an appreciation of the role and interpretation of capnography.
• Develop strategies to better manage airway emergencies.

CALL FOR POSTER ABSTRACTS
DEADLINE FOR SUBMISSION OF ABSTRACTS: AUGUST 15, 2020

Detailed submission guidelines, abstract submission form, and disclosure form can be found at: www.PediatricSedationConference.com

Abstracts are blindly reviewed by the abstract committee. Presenting authors will be notified if their abstract is chosen for poster display at the November 14-15, 2020 Weekend Conference.
### WEEKEND CONFERENCE SCHEDULE

**SATURDAY, NOVEMBER 14, 2020**

Weekend Conference Day 1: “Exploring the Realms” in Pediatric Sedation  
**Course Director:** Keira P. Mason, MD  
**Director, Pediatric Dental Sedation Conference:** James Tom, DDS, MS, FACD

## Online Information

To register or view activity information online, visit:  
[www.PediatricSedationConference.com](http://www.PediatricSedationConference.com)

## Course Location

All sessions for this course will be held at Hilton Financial District Hotel,  
750 Kearny St., San Francisco, CA 94108

## Disclaimer

CME activities sponsored by Boston Children's Hospital are offered solely for educational purposes and do not constitute any form of certification of competency. Practitioners should always consult additional sources of information and exercise their best professional judgment before making clinical decisions of any kind.

Boston Children's Hospital adheres to all ACCME Essential Areas, Standards, and Policies. It is Boston Children's policy that those who have influenced the content of a CME activity (e.g. planners, faculty, authors, reviewers and others) disclose all relevant financial relationships with commercial entities so that Boston Children's may identify and resolve any conflicts of interest prior to the activity. These disclosures will be provided in the activity materials along with disclosure of any commercial support received for the activity. Additionally, faculty members have been instructed to disclose any limitations of data and unlabeled or investigational uses of products during their presentations.
**Combination Specials**

**Course Package A: Three Full-Days (Friday-Sunday)**
Includes: Friday, Full-Day Sedation Symposium: The Basics and Beyond for Hospital-Based and Dental Sedation AND Weekend Course: “Exploring the Realms” in Pediatric Sedation

$1,300

**Course Package B: Two Full-Days (Saturday-Sunday)**
Weekend Course: “Exploring the Realms” in Pediatric Sedation

$799

**Course Package C: One Day Option (Saturday or Sunday)**
Saturday or Sunday of Weekend Course: “Exploring the Realms” in Pediatric Sedation.

$449
Friday, November 13, 2020

Full-Day Pediatric Sedation Simulation Workshops *Extremely Limited Enrollment* $679
Full-Day Sedation Symposium: The Basics and Beyond for Hospital-Based and Dental Sedation $589
Airway Management: A Hands-On Workshop *Limited Enrollment* $100
Capnography Workshop: A Hands-On Workshop of Utilization and Interpretation *Limited Enrollment* $100
Challenging Dental Case Studies: Interactive Workshop $75
The Pearls of Non-Pharmacological Behavioral Techniques $75
**Pediatric Advanced Life Support (PALS) Provider Course for Dentists and Dental Specialists (4:30-7:00PM)** $200

Saturday - Sunday, November 14-15, 2020

**Two Day Weekend Course: “Exploring the Realms”**
Physicians/Dentists $799
Residents/Fellows, Nurses, and Allied Health Professionals $549
**Optional Add-On:** Pediatric Dental Sedation Simulation Workshop. Dentists can replace half a day of didactics on Saturday 11/14 (weekend conference) for the dental simulation workshop.

**Optional Breakfast Breakout Panels and Workshops:**
- Dexmedetomidine $50
- Ketamine $50
- Strategies in Creating a Child Friendly Environment $50
- Radiological Imaging $50
- Airway Management: A Hands-On Workshop *Limited Enrollment* $50
- Capnography Workshop: A Hands-On Workshop of Utilization and Interpretation *Limited Enrollment* $50
- Patient Care without the Scare $50

**Optional Lunch Breakout Panels and Workshops:**
- Airway Management: A Hands-On Workshop (Offered Friday Lunch Only) *Limited Enrollment* $100
- Capnography Workshop: A Hands-On Workshop of Utilization and Interpretation (Offered Friday Lunch Only) *Limited Enrollment* $100
- Challenging Dental Case Studies: Interactive Workshop $75
- Innovative Strategies and Approaches to Behavioral Management: Hands-On Workshop $75
- Pain Distraction Workshop: The Powers of Virtual Reality and Acupuncture $75
- Propofol $75
- Sedation for Emergency Procedures (Interactive Workshop) $75
- IV Access Workshop $75

Saturday, November 14, 2020

**A Comprehensive Approach to Pediatric Dental Sedation: The Didactics AND High-Fidelity Dental Sedation Simulation Combination (Lunch Included)** $828
Full-day of didactics and simulation. Comprehensive dental sedation crisis management (Includes: Didactics specifically focused on sedation for pediatric dentistry) Dental sedation simulation workshop tailored for dental specialists.

**A Comprehensive Approach to Pediatric Dental Sedation: The Didactics ONLY (Lunch Included)** $449
Comprehensive dental sedation curriculum: A holistic approach to keeping it safe

**A Comprehensive Approach to Pediatric Dental Sedation: High-Fidelity Dental Sedation Simulation ONLY** $679
Dental sedation simulation workshop tailored for dental specialists. *Limited Enrollment*

Please note, a complete schedule for the Pediatric Dental Sedation Didactics and Symposium offerings are available online at: [www.PediatricSedationConference.com](http://www.PediatricSedationConference.com)
FRIDAY, NOVEMBER 13, 2020
FULL-DAY SEDATION SYMPOSIUM
The Basics and Beyond for Hospital-Based and Dental Sedation

Special Limited Enrollment Offering
FULL-DAY PEDIATRIC SEDATION SIMULATION WORKSHOPS

NOVEMBER 14-15, 2020
